STANDARD	As adjudicators hear singers they should compare the singer's performance against the general standard for the category they are adjudicating		
<p><b>Tone:</b> Singer shows mastery of the vocal technique required for the repertoire chosen (mix, belt, and/or legit), and has the ability to make subtle changes appropriate to the style and character. Changes in registration balance are relatively smooth and even. (Refer to the FAQ for additional explanation.)</p> <p><b>Mix:</b> All sounds in music theater are some form of mixed registration. The resonance is "speech-like" and intelligibility is a priority. Choosing a head-dominant or chest-dominant mix depends on character, style, and story. Most contemporary music theater songs take advantage of a variable registration/resonance, crossing the spectrum from light to heavy</p> <p><b>Belt:</b> An acoustic strategy, belt is sometimes referred to as the "calling voice." It is a bright chest- dominant mix accessible on open vowels, and occurs between F4 and D5. Above D5, it becomes the "high belt" chest dominant resonance popular in contemporary styles. A belt is frequently used to express moments of soaring emotion. It can be vibrant or retain a straight tone.</p> <p><b>Legit:</b> This sound is often described as "lyrical" and "lofty." It shares a resonance similar to classical singing, but retains a more speech-like articulation.</p> <p>For audio examples of each style, refer to: <a href="https://www.nats.org/nsaresources.html#audio-examples">https://www.nats.org/nsaresources.html#audio-examples</a></p>
